IDENTIFIERS	*Roman Catholic Church

ABSTRACT

This report presents the findings of a survey of both the public's and Catholics' attitudes toward public and Catholic schools and school choice. While members of the general public were more likely to give their own community's schools a high grade, about half of them judged schools nationally as average. Responses were similar for Catholics. However, Catholics graded Catholic schools higher than did the general public in several areas. About 60 percent of the general public and 70 percent of Catholics supported using tax money to fund school choice. Slightly more than half of all respondents believed they had sufficient information about the schools in their community to choose one if school choice were an option. The report includes detailed findings on several question areas, including grading of the school attended by the respondent's oldest child. Also included is a rating of specific aspects of education, including knowledge of respondent's community's schools, opinion regarding the voucher system, and attitudes toward government-supported parental choice of schools. A technical appendix includes information on the sample composition, on telephone omnibus sample design, and on sampling tolerances. The survey questions are provided next, and these are followed by a section of detailed tabulations which makes up the bulk of the document. (JPT)

PREFACE

Fall 1992

As part of the efforts of the National Catholic Educational Association (NCEA) to spread the good news about Catholic schools, NCEA commissioned *The People's Poll on Schools and School Choice*. NCEA requested the Gallup Organization to formulate the questions, conduct the poll, and provide an analysis of the data. The Gallup Organization was chosen because of its earned reputation of excellence and its familiarity with education through the annual poll it conducts on public schools.

The People's Poll on Schools and School Choice is part of the process of the National Congress on Catholic Schools for the Twenty-first Century. This ongoing program has the goals of communicating the accomplishments of Catholic schools to the general public, celebrating their achievements and planning for the future of Catholic schools. The planners of this poll wished to obtain an accurate understanding of the perceptions of the American public regarding the quality of Catholic schools and of the support for parental choice in education for parents who select public, private or religious affiliated schools.

Funding for this poll was made possible by contributions from all the offices of the arch/diocesan Superintendents of Schools and numerous individual Catholic elementary and secondary schools.

Barbara Keebler, NCEA Director of Public Relations, coordinated the project with a committee composed of Sister Catherine McNamee, President of NCEA; Sister Regina Haney, Executive Director of the Boards of Catholic Education; Dr. Robert Kealey, Executive Director of the Department of Elementary Schools; Mr. Michael Guerra, Executive Director, Department of Secondary Schools; and Mr. Frank Savage, Executive Director of the Department of Chief Administrators of Catholic Education. This committee, working with the Gallup Organization, planned the poll, reviewed the wording of the questions, and determined the means of disseminating the results.

NCEA presents the complete data from *The People's Poll on Schools and School Choice* with the hope that Americans will have a deeper appreciation for the contributions that Catholic schools make to American society, and to further the discussion on parental choice in education for parents of all children in public, private or parochial schools. Such information should be most helpful to researchers and to those responsible for formulating and implementing public policy.

DETAILED TABULATIONS 43

INTRODUCTION

The following report is based on the findings of a survey conducted for the National Catholic Educational Association. The objective of the study was to measure both the public's and Catholic's attitudes toward various aspects of education provided by public and Catholic schools and more specifically to compare the general public's opinions regarding parental choice of schools to that of Roman Catholics.

To meet the stated objectives, The Gallup Organization interviewed a total of 1,239 adults 18 years of age and over. Of this group, 492 were identified as Roman Catholic. The survey results are based on telephone interviews with a national sample of adults, 18 years of age or older conducted from July 3 through July 30, 1992. The following report compares the findings of the general public to those who stated their religious preference as Roman Catholic. For results based on a sample of 1,239, one can say with 95% confidence that the error attributable to sampling and other random effects could be plus or minus three percentage points. For results based on the sample of 492 Roman Catholics, the sampling error is plus or minus 5 percentage points. In addition to sampling error, question wording and practical difficulties in conducting surveys can introduce error or bias into the findings of opinion polls.

A description of the composition of the sample, sample design, weighting procedures used, tables or recommended sampling tolerances and the questions asked are located in the Technical Appendix to this report.

DETAILED FINDINGS

Grading of Schools

The Question: *Students are often given the grades A,B,C,D, and FAIL to denote the quality of their work. Suppose the PUBLIC schools, themselves, in your community were graded in the same way. What grade would you give the public schools in your area -- A,B,C,D, or FAIL?*

How about the public schools in the nation as a whole. What grade would you give the public schools, nationally, -- A,B,C,D, or FAIL?

Suppose the CATHOLIC schools, themselves, in your community, were graded in the same way. What grade would you give the Catholic schools in your area -- A,B,C,D, or FAIL?

What about the Catholic schools in the nation as a whole. What grade would you give the Catholic schools, nationally, -- A,B,C,D, or FAIL?

Using grades A,B,C,D and F, everyone was asked to grade the public schools and Catholic schools in their community and, again, in the nation as a whole. Adults are much more likely to grade their own community's public schools higher than those of the national as a whole (17% giving their community's schools an "A" and only 3% giving the nation's public schools an "A"). Approximately half the adults grade the nation's schools a "C."

In grading the public schools, the responses of Catholics and the general population are similar. However, when grading Catholic schools, Catholics are more likely than the general public to give Catholic schools in their community an "A" (32% -vs- 21%) and Catholic schools in the nation as a whole an "A."

Grading of School Oldest Child Attends

The Question: *Using the A,B,C,D, and FAIL scale again, what grade would you give the school your oldest child attends?*

When parents are asked specifically about the school their oldest child attends, one-third (34%) of the general population and four in ten (40%) Catholics give this school an "A." Parents who report that their oldest child is at the top of his/her class or above average are more likely than parents who rate their child average or below average to grade the school their oldest child attends an "A."

Rating of Specific Aspects of Education:
A Comparison of General Population -vs- Catholics

The Question: *I am going to read to you some factors involved in education. For each, I'd like you to tell me if you think, in general, Catholic schools are better than public schools in this regard, public schools are better than Catholic schools in this regard or are they about the same. First ..(READ AND ROTATE). ... Are Catholic schools better than public schools, public schools better than Catholic schools or are they about the same?*

Everyone was read 16 aspects of education and asked to state whether they felt the Catholic schools were better in this regard, the public schools were better or whether they were about the same on each of the 16 educational factors. A majority of the general population and Catholics rated Catholic schools better than public schools on the following attributes:

- For the level of discipline provided
- For developing morals and ethical behavior
- For small class sizes
- For providing an environment with less chance for students to get involved in drugs or alcohol
- For the safety of students

A majority of the general population rated public schools better than Catholic schools on the following attributes:

- For the number and variety of extra-curricular activities such as sports, clubs, music and drama
- For having students from a wide range of social, ethnic, racial and economic backgrounds
- For providing special programs for students with learning problems
- For the variety and number of academic courses offered

With the exception of the variety and number of academic courses offered, for which 47% rated public schools better, a majority of Catholics also rated the public schools better for the above attributes.

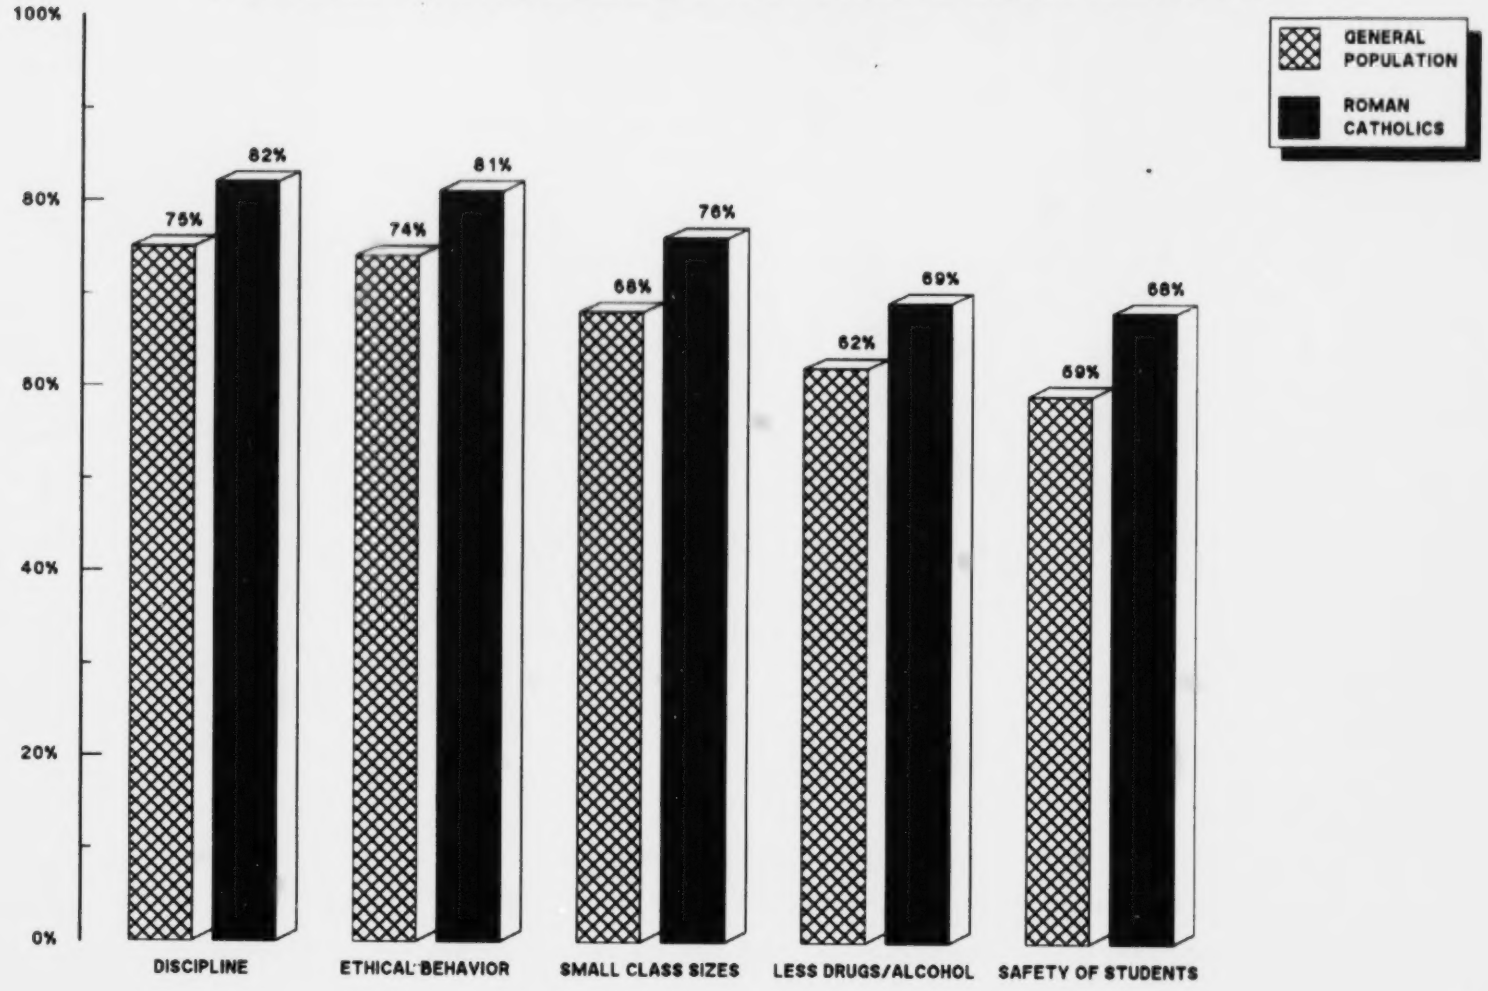
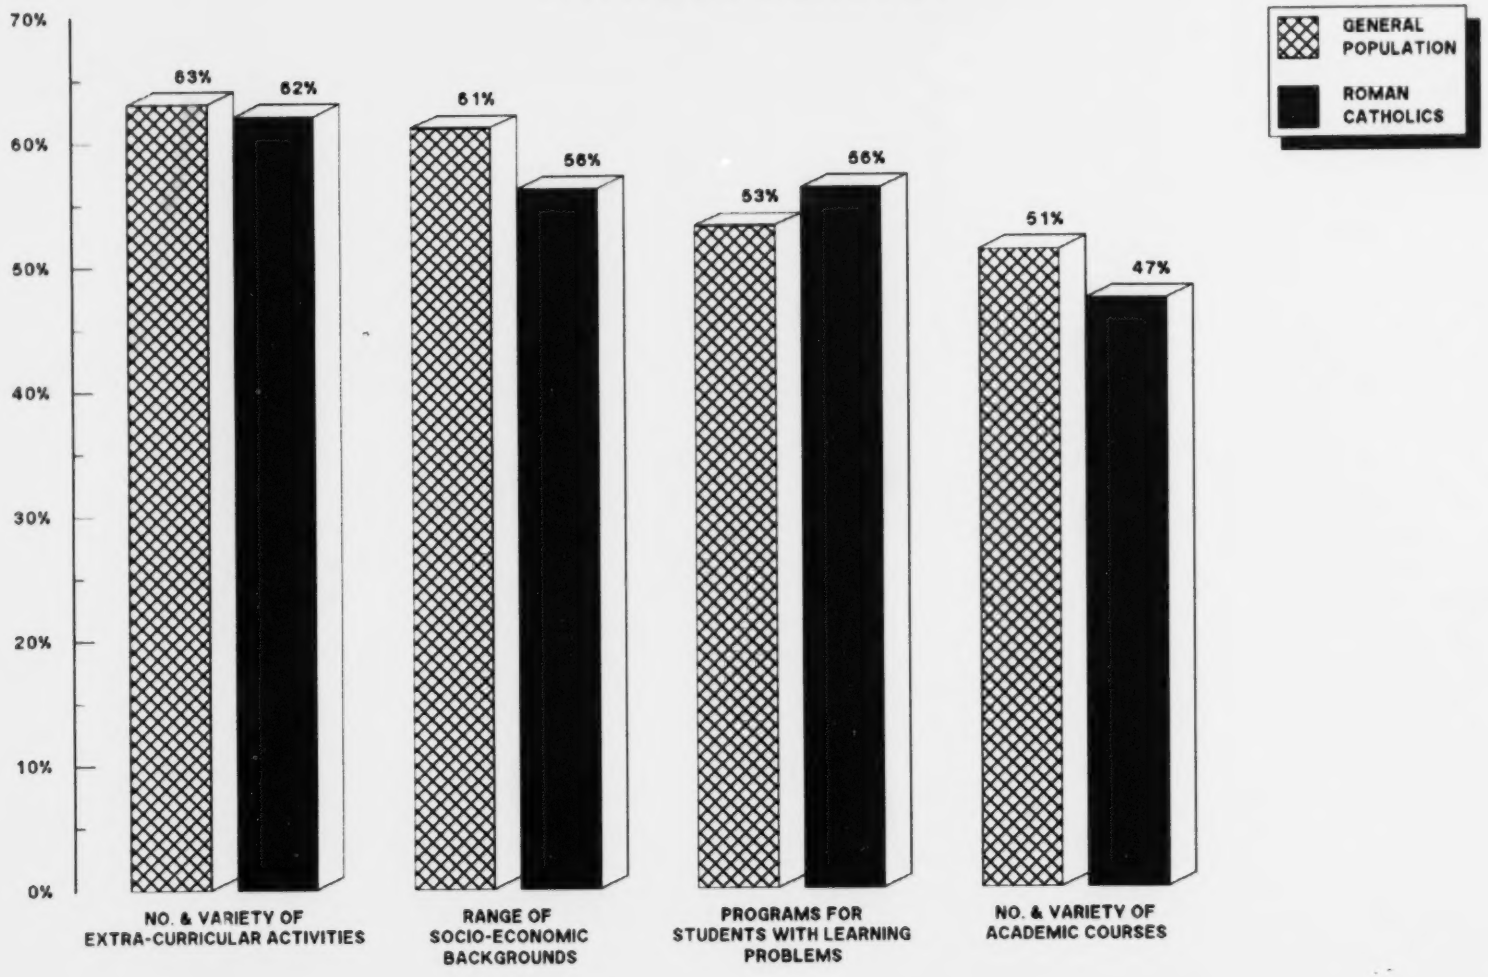
ATTRIBUTES FOR WHICH A MAJORITY RATE CATHOLIC SCHOOLS BETTER THAN PUBLIC SCHOOLS



ATTRIBUTES FOR WHICH A MAJORITY OF GENERAL POPULATION RATE PUBLIC SCHOOLS BETTER THAN CATHOLIC SCHOOLS



Knowledge of Community's Schools

The Question: *Suppose you could choose any school in your school district, that is, the public schools, private schools or parochial schools. Do you feel you have enough information about the different schools in your community to make the best choice for a child, or not?*

Slightly more than half of those surveyed report that they have enough information about the different schools in their community to make the best choice for a child, while 46% say they do not have enough information. Adults who have children in school, especially those in a Catholic or private school are the most likely to say they have enough information to make the best choice for their child.

ENOUGH INFORMATION ABOUT COMMUNITY'S SCHOOLS TO MAKE BEST CHOICE FOR A CHILD

	Yes %	No %	DK/RF %	Total %	Number of Interviews
General Population	53	46	1	100	(1239)

No, none in school	51	48	1	100	(858)

Opinion Regarding The Voucher System

The Question: *In some nations, the government allots a certain amount of money for each child for his education. The parents can then send the child to any public, parochial or private school they choose. This is called the "voucher system." Would you like to see such an idea adopted in this country?*

Seven in ten of the general population favors the voucher plan. Among Catholics, the proportion favoring a voucher system is 80%. Adults who have children in school are more likely than those who do not, to favor the idea of a voucher system (78% vs. 67%). Among those who have children in a Catholic or private school, 84% say they would like to see such an idea adopted in this country.

WOULD LIKE "VOUCHER SYSTEM" IN THIS COUNTRY

No, none in school	67	29	4	100	(858)

Attitudes Toward Government-Supported Parental Choice of Schools

The Question: *There has been a lot of discussion about government-supported parental choice of schools. What this means is that some of the tax money that now goes to public schools would be given to parents so they can send their children to the public, private or parochial school of their choice. Would you be willing to see some of the tax money now going to public schools used to send children to the public, private or parochial school their parent chooses?*

If the government were to provide funding to parents to send their children to the schools of their choice, should the government provide funding for poor families only, poor and moderate income families or all families?

Everyone was read a short description of government-supported parental choice of schools and then asked if they would be willing to see some of the tax money now going to public schools used to send children to the public, private or parochial school their parent chooses. Three in five among the general population and seven in ten Catholics say they would be willing to see some of the tax money now going to public schools used to send children to the public, private or parochial schools their parent chooses. Among adults with children in school, more than two-thirds (68%) report a willingness to use tax money for public schools in this way, slightly higher than the 58% who do not have children in school who express a willingness.

Adults between the ages of 18 and 34 are the most likely age group to say they would be willing to see some of the tax money now going to public schools used to support parental choice of schools. Those least willing are adults 55 years of age and over.

Asked which groups should receive funding if the government provided funding to parents to send their children to the schools of their choice the majority among all demographic groups would like funding provided to all families. More than one in five (27%) believe funding should go to poor and moderate income families, while 10% would want poor families only to be funded.

Opinion Regarding Public Financial Support
For Parents Who Choose Religious-Affiliated Schools

The Question: *Some think that government support for parental choice in education including religious affiliated schools in the U.S. would be unconstitutional. Others believe it would be constitutional. Suppose the Supreme Court rules that it is constitutional for state or federal governments to provide some public financial support for parents who choose religious-affiliated schools. Would you favor or oppose your state or federal government providing such support?*

More than three in five adults report that they would favor government support for parents who choose religious-affiliated schools for their children if the Supreme Court ruled it constitutional for state or federal government to provide public financial support for these schools.

The highest level of support comes from adults 18 to 34; those who are willing to see some of the tax money now going to public schools go toward parental choice of education; and parents who have children in Catholic or private schools.

TELEPHONE OMNIBUS SAMPLE DESIGN

The Gallup Organization's standard national telephone samples are unclustered random digit dial (RDD) samples purchased from Survey Sampling, Incorporated, and are based on a proportionate stratified sampling design.

The random digit aspect of the sample is used to avoid "listing" bias. According to the most recent estimates from the Bureau of the Census, there are 91 million households in the United States, and approximately 92.5% of them contain one or more telephones. Telephone directories only list about 71% of such "telephone households," and numerous studies have shown that households with unlisted telephone numbers are different in several important ways from listed households. Moreover, nearly 15% of listed telephone numbers are "discontinued" due to household mobility and directory publishing lag, and it is reasonable to assume that a roughly equal number are working residential numbers too new to be found in published directories.

In order to avoid these various sources of bias, a random digit procedure designed to provide representation of both listed and unlisted (including not-yet-listed) numbers is used. The design of the sample ensures this representation by random generation of the last two digits of telephone numbers selected on the basis of their area code, telephone exchange (the first three digits of a seven digit telephone number), and bank number (the fourth and fifth digits).

The selection procedure produces a sample that is superior to random selection from a frame of listed telephone households, and the superiority is greater to the degree that the assignment of telephone numbers to households is made independently of their publication status in the directory. That is, if unlisted numbers tend to be found in the same telephone banks as listed numbers and if, in general, banks

containing relatively few listed numbers also contain relatively few unlisted numbers, then the sample that results from the procedure described below will represent unlisted telephone households fully as well as it represents listed households. Random number selection within banks ensures that all numbers within a particular bank (whether listed or unlisted) have the same likelihood of inclusion in the sample, and that the sample so generated will represent listed and unlisted telephone households in the appropriate proportions.

A database of listed telephone numbers for the continental United States is first stratified into 4 regions of the country and, within region, telephone numbers are further stratified into three size-of-community strata: (a) incorporated cities of population 1,000,000 and over; (b) incorporated cities of population 250,000 to 999,999; and (c) the remainder of the continental United States. Separate samples are drawn from each of the resulting 12 region/ size-of-community strata. The first eight digits of the sample telephone numbers (area code, telephone exchange, and bank number) are then selected after further geographic pre-stratification of this database so that within each region and size-of-community stratum state, county, and telephone exchange within county are all represented in their appropriate proportions. That is, the number of telephone numbers randomly sampled from within a given exchange is proportional to that exchange's share of listed telephone households in the set of exchanges from which the sample is drawn.

Only working banks of numbers are selected. A working bank is defined as 100 contiguous telephone numbers containing three or more residential telephone listings. By eliminating non-working banks of numbers from the sample, the likelihood that any sampled telephone number will be associated with a residence increases from only 20% (where all banks of numbers are sampled) to between 60% and 70%.

The sample of telephone numbers produced by this method is thus designed to produce an unbiased random sampling of telephone households in the continental United States.

Quotas for completed interviews within each of the twelve strata are set proportionate to the distribution of continental United States telephone households in the twelve areas.

Within each contacted household, an interview is sought with the youngest man 18 years or older who is at home. If no man is at home, an interview is sought with the oldest woman at home. In addition, a quota is set so that 50% of completed interviews in each of the 12 areas are male and 50% are female. This method of respondent selection within households produces an age distribution by sex that closely approximates the age by sex distribution of the total population.

Up to three calls are made to each selected telephone number in order to complete an interview. The time of day and the day of the week for callbacks is varied so as to maximize the chances of finding a respondent at home. All interviews are conducted on weekends or weekday evenings so that potential respondents who work full-time can be contacted.

For the general population, the final sample is weighted so that the region by age by sex by education distribution and the region by sex by race distribution of the sample matches current estimates derived from the U.S. Census Bureau's Current Population Survey (CPS) for the adult population living in telephone households in the continental U.S.

Roman Catholics were weighted to match current demographic characteristics of all Roman Catholics living in telephone households in the continental U.S.

SAMPLING TOLERANCES

In interpreting survey results, it should be borne in mind that all sample surveys are subject to sampling error, that is, the extent to which the results may differ from what would be obtained if the whole population had been interviewed. The size of such sampling errors depends largely on the number of interviews.

The following tables may be used in estimating the sampling error of any percentage in this report. The computed allowances have taken into account the effect of the sample design upon sampling error. They may be interpreted as indicating the range (plus or minus the figure shown) within which the results of repeated samplings in the same time period could be expected to vary, 95 percent of the time, assuming the same sampling procedures, the same interviewers, and the same questionnaire.

The first table shows how much allowance should be made for the sampling error of a percentage:

RECOMMENDED ALLOWANCE FOR SAMPLING ERROR OF A PERCENTAGE

IN PERCENTAGE POINTS (AT 95 IN 100 CONFIDENCE LEVEL)*

		SAMPLE SIZE					
		1239	800	492	300	200	100
PERCENTAGES NEAR	10	2	2	3	4	5	7
PERCENTAGES NEAR	20	3	3	4	5	7	9
PERCENTAGES NEAR	30	3	4	5	6	8	11
PERCENTAGES NEAR	40	3	4	5	7	8	12
PERCENTAGES NEAR	50	3	4	5	7	8	12
PERCENTAGES NEAR	60	3	4	5	7	8	12
PERCENTAGES NEAR	70	3	4	5	6	8	11
PERCENTAGES NEAR	80	3	3	4	5	7	9
PERCENTAGES NEAR	90	2	2	3	4	5	7

* THE CHANCES ARE 95 IN 100 THAT THE SAMPLING ERROR IS NOT LARGER THAN THE FIGURE SHOWN.

The table would be used in the following manner: Let us say a reported percentage is 33 for a group which includes 1239 respondents. Then we go to row "percentages near 30" in the table and go across to the column headed "1239". The number at this point is 3, which means that the 33 percent obtained in the sample is subject to a sampling error of plus or minus 3 points. Another way of saying it is that very probably (95 chances of 100) the true figure would be somewhere between 30 and 36, with the most likely figure the 33 obtained.

In comparing survey results in two samples, such as, for example, men and women, the question arises as to how large a difference between them must be before one can be reasonably sure that it reflects a real difference. In the tables below, the number of points which must be allowed for in such comparisons is indicated.

Two tables are provided. One is for percentages near 20 or 80; the other for percentages near 50. For percentages in between, the error to be allowed for is between those shown in the two tables.

RECOMMENDED ALLOWANCE FOR SAMPLING ERROR OF THE DIFFERENCE BETWEEN 20 % AND 80 %

IN PERCENTAGE POINTS (AT 95 IN 100 CONFIDENCE LEVEL)*

SAMPLE SIZE

	1239	800	492	300	200	100
1239	4					
800	4	5				
492	5	5	6			
300	6	6	7	8		
200	7	7	8	9	9	
100	10	10	10	11	12	13

RECOMMENDED ALLOWANCE FOR SAMPLING ERROR OF THE DIFFERENCE BETWEEN 50 % AND 50 %

IN PERCENTAGE POINTS (AT 95 IN 100 CONFIDENCE LEVEL)*

SAMPLE SIZE

	1239	800	492	300	200	100
1239	5					
800	5	6				
492	6	7	7			
300	8	8	9	10		
200	9	9	10	11	12	
100	12	12	13	14	14	17

* THE CHANCES ARE 95 IN 100 THAT THE SAMPLING ERROR IS NOT LARGER THAN THE FIGURE SHOWN.

Here is an example of how the tables would be used: Let us say that 50 percent of men responded a certain way and 40 percent of women respond that way also, for a difference of 10 percentage points between them. Can we say with any assurance that the 10-point difference reflects a real difference between men and women on the question? The sample contains approximately 800 men and 300 women. Since the percentages are near 50, we consult the third table, and since the two samples are 500 persons each, we look for the number 8 here. This means that the allowance for error should be 8 points, and that in concluding that the percentage among men is somewhere between 2 and 18 points higher than the percentage among women we should be wrong only about 5 percent of the time. In other words, we can conclude with considerable confidence that a difference exists in the direction observed and that it amounts to at least 2 percentage points.

If, in another case, men's responses amount to 22 percent, say, and women's 24 percent, we consult Table A because these percentages are near 20. We look for the number in the column headed "800" and see that it is 6. Obviously, then, the two-point difference is inconclusive.

THE QUESTIONS

NATIONAL CATHOLIC EDUCATION ASSOCIATION

1. As you know, in some communities there are three kinds of schools -- the public schools, the parochial or church-related schools, and the private schools, sometimes called "independent" schools. First, I'd like to know if you, yourself, have any children in the local public schools, that is kindergarten, elementary, junior or high school?

   1 Yes

   2 No

   3 DK/RF

2a. Do you, yourself, have any children in private, parochial or church-related schools, that is in kindergarten, elementary, junior or high school?

   1 Yes

   2 No - GO TO Q.3

   3 DK/RF - GO TO Q.3

2b. Is this school a Catholic school?

   1 Yes

   2 No

   3 DK/RF

3. Students are often given the grades A,B,C,D, and FAIL to denote the quality of their work. Suppose the PUBLIC schools, themselves, in your community were graded in the same way. What grade would you give the public schools <u>in your area</u> -- A,B,C,D, or FAIL?

   1 A

   2 B

   3 C

   4 D

   5 FAIL

   6 DK/RF

4. How about the public schools in the nation as a whole. What grade would you give the public schools, nationally, -- A,B,C,D, or FAIL?

1 A

2 B

3 C

4 D

5 FAIL

6 DK/RF

5. Suppose the CATHOLIC (PAROCHIAL) schools, themselves, in your community, were graded in the same way. What grade would you give the Catholic schools in your area -- A,B,C,D, or FAIL?

1 A

2 B

3 C

4 D

5 FAIL

6 DK/RF

6. What about the Catholic schools in the nation as a whole. What grade would you give the Catholic schools, nationally, -- A,B,C,D, or FAIL?

1 A

2 B

3 C

4 D

5 FAIL

6 DK/RF

ASK ALL WITH CHILDREN IN SCHOOL: OTHERS GO TO Q.8

7. Using the A,B,C,D, and FAIL scale again, what grade would you give the school your oldest child attends?

1 A

2 B

3 C

4 D

5 FAIL

6 DK/RF

8. I am going to read to you some factors involved in education. For each, I'd like you to tell me if you think, in general, Catholic schools are better than public schools in this regard, public schools are better than Catholic schools in this regard or are they about the same. First ..**(READ AND ROTATE)**. ... Are Catholic schools better than public schools, public schools better than Catholic schools or are they about the same?

	Catholic Schools Better	Public Schools Better	About the Same	DK/RF
a) For the overall quality of education.	1	2	3	4
b) For the level of discipline provided	1	2	3	4
c) For the safety of students .	1	2	3	4
d) For developing morals. . and ethical behavior	1	2	3	4
e) For small class sizes. . . .	1	2	3	4
f) For having students from a wide range of social, ethnic, racial and economic backgrounds . .	1	2	3	4
g) For the quality of the teaching staff	1	2	3	4
h) For the quality of the schools' physical facilities	1	2	3	4
i) For the variety and number of academic courses offered. . .	1	2	3	4
j) For providing special programs for students with learning problems.	1	2	3	4

k) For preparing students to get along with people from different social, economic, racial or ethnic backgrounds	1	2	3	4
l) For providing special programs for gifted or talented students	1	2	3	4
m) For the number and variety of extra-curricular activities such as sports, clubs, music and drama.	1	2	3	4
n) For preparing students to deal with the problems of modern society.	1	2	3	4
p) For providing an environment with less chance for students to get involved in drugs or alcohol.	1	2	3	4
q) For providing children a good foundation in academic subjects.	1	2	3	4

9. In some nations, the government allots a certain amount of money for each child for his education. The parents can then send the child to any public, parochial or private school they choose. This is called the "voucher system." Would you like to see such an idea adopted in this country?

   1 Yes

   2 No

   3 DK/RF

10. Suppose you could choose any school in your school district, that is, the public schools, private schools or parochial schools. Do you feel you have enough information about the different schools in your community to make the best choice for a child, or not?

   1 Yes

   2 No

   3 DK/RF

ASK ALL PARENTS WITH CHILDREN IN SCHOOL: OTHERS GO TO Q.14

11. Thinking about your oldest child now attending school, what grade is he/she in?

   _____Grade

12. Does he/she attend a public school, private Catholic or private non-Catholic school?

1 Public

2 Private Catholic (Parochial)

3 Private Non-Catholic

4 DK/RF

13. Is this child at the top of his/her class, above average, average, or below average in his/her grades?

1 Top or near top of class

2 Above average

3 Average

4 Below average

5 DK/RF

ASK EVERYONE:

14. There has been a lot of discussion about government-supported parental choice of schools. What this means is that some of the tax money that now goes to public schools would be given to parents so they can send their children to the public, private or parochial school of their choice. Would you be willing to see some of the tax money now going to public schools used to send children to the public, private or parochial school their parent chooses?

1 Yes

2 No

3 DK/RF

15. If the government were to provide funding to parents to send their children to the schools of their choice, should the government provide funding for poor families only, poor and moderate income families or all families?

1 Yes, poor families only

2 Yes, poor and moderate income families

3 Yes, all families

4 None of the above **(VOLUNTEERED RESPONSE)**

5 DK/RF

16. Some think that government support for parental choice in education including religious affiliated schools in the U.S. would be unconstitutional. Others believe it would be constitutional. Suppose the Supreme Court rules that it is constitutional for state or federal governments to provide some public financial support for parents who choose religious-affiliated schools. Would you favor or oppose your state or federal government providing such support?

1 Favor

2 Oppose

3 DK/RF

17. Did you attend a Catholic school for at least one year during **(READ A-B)**?

	YES	NO	DK/RF
A) 1st through 8th grades	1	2	3
B) 9th through 12th grades	1	2	3

Q.14 THERE HAS BEEN A LOT OF DISCUSSION ABOUT GOVERNMENT-SUPPORTED PARENTAL CHOICE OF SCHOOLS. WHAT THIS MEANS IS THAT SOME OF THE TAX MONEY THAT NOW GOES TO PUBLIC SCHOOLS WOULD BE GIVEN TO PARENTS SO THEY CAN SEND THEIR CHILDREN TO THE PUBLIC, PRIVATE OR PAROCHIAL SCHOOL OF THEIR CHOICE. WOULD YOU BE WILLING TO SEE SOME OF THE TAX MONEY NOW GOING TO PUBLIC SCHOOLS USED TO SEND CHILDREN TO THE PUBLIC, PRIVATE OR PAROCHIAL SCHOOL THEIR PARENT CHOOSES?

Q.16 SOME THINK THAT GOVERNMENT SUPPORT FOR PARENTAL CHOICE IN EDUCATION INCLUDING RELIGIOUS AFFILIATED SCHOOLS IN THE U.S. WOULD BE UNCONSTITUTIONAL. OTHERS BELIEVE IT WOULD BE CONSTITUTIONAL. SUPPOSE THE SUPREME COURT RULES THAT IT IS CONSTITUTIONAL FOR STATE OR FEDERAL GOVERNMENTS TO PROVIDE SOME PUBLIC FINANCIAL SUPPORT FOR PARENTS WHO CHOOSE RELIGIOUS-AFFILIATED SCHOOLS. WOULD YOU FAVOR OR OPPOSE YOUR STATE OR FEDERAL GOVERNMENT PROVIDING SUCH SUPPORT?

Q.1 AS YOU KNOW, IN SOME COMMUNITIES THERE ARE THREE KINDS OF SCHOOLS -- THE PUBLIC SCHOOLS, THE PAROCHIAL OR CHURCH-RELATED SCHOOLS, AND THE PRIVATE SCHOOLS, SOMETIMES CALLED "INDEPENDENT" SCHOOLS. FIRST, I'D LIKE TO KNOW IF YOU, YOURSELF, HAVE ANY CHILDREN IN THE LOCAL PUBLIC SCHOOLS, THAT IS KINDERGARTEN, ELEMENTARY, JUNIOR OR HIGH SCHOOL?

Q.14 THERE HAS BEEN A LOT OF DISCUSSION ABOUT GOVERNMENT-SUPPORTED PARENTAL CHOICE OF SCHOOLS. WHAT THIS MEANS IS THAT SOME OF THE TAX MONEY THAT NOW GOES TO PUBLIC SCHOOLS WOULD BE GIVEN TO PARENTS SO THEY CAN SEND THEIR CHILDREN TO THE PUBLIC, PRIVATE OR PAROCHIAL SCHOOL OF THEIR CHOICE. WOULD YOU BE WILLING TO SEE SOME OF THE TAX MONEY NOW GOING TO PUBLIC SCHOOLS USED TO SEND CHILDREN TO THE PUBLIC, PRIVATE OR PAROCHIAL SCHOOL THEIR PARENT CHOOSES?
